# Thermo Scientific S1 Pipet Filler

Your time is valuable and faster performance is essential. Trust the Thermo Scientific S1 Pipet Filler to deliver everything you need to stay productive in the lab:

## Faster Performance • Advanced Speed Controls • Longer Battery Life

The portable lightweight S1 Pipet Filler is designed for use with either glass or plastic serological pipets. It offers effective streamlined pipetting performance with maximum pipetting comfort.

### Monitor Performance.

The backlit LCD display screen shows remaining battery life and alarms with a blinking light when the battery charge gets low, minimizing the risk of a slowing pipette in the middle of a procedure. Current speed settings are indicated on the display for convenience.

### Ready when you need it.

Sustain lightweight, cordless pipetting with the Thermo Scientific S1 Pipet Filler featuring a heavy-duty lithium-ion battery. Operation lasts three times longer between charges than typical units using nickel-metal hydride batteries — so your S1 pipet filler is ready when you need it. The powerful motor ensures fast and efficient pipetting. A 50 ml pipet is filled in less than 6 seconds!

### Control Speed.

Separate aspirate and dispense buttons on the rear of the S1 pipet filler individually set aspiration (upper button) and dispense (lower button) speeds. Choose from eight speeds with a simple “+” or “-” to adjust pipetting speed which is displayed on the LCD. A zero speed selection on dispense enables gravity dispensing and extra slow aspiration speeds prevent overpipetting when using 1 ml pipets.

### Your choice of colors.

Available in your choice of five colors, the S1 pipet filler is a fun addition to the lab. With a customizable ID area the pipet filler permits easy recognition of ownership and/or task designation.
